We are serious about our responsibility to tackle global climate change. That is why we chose to be cancelling our carbon emissions with the internationally recognised Carbon Clear company(www.carbon-clear.com).

Carbon Clear invests in projects that remove carbon dioxide from the air by replacing polluting technologies with clean ones, and planting native trees. Carbon Clear's projects are in developing countries and are carefully screened to ensure they improve local people's wellbeing.

We have worked with Carbon Clear to calculate the exact amount of carbon dioxide we emit, and Carbon Clear has identified projects that prevent the same amount of carbon dioxide from entering the atmosphere. Projects range from improved brick kilns in Nicaragua that save wood, boosts income for locals and reduces

OFFICIAL: - -

greenhouse gases, to a tree planting cooperative in India that provides local people with food and medicines as well as soaking up carbon dioxide. All Carbon Clear's projects are guaranteed to meet the highest standards of social development and environmental rigour.

We've reduced our carbon emissions as much as we can, but we all realise it's hard to cut our pollution entirely. That's why we've chosen Carbon Clear to offset our remaining carbon emissions. For more information, please visit www.carbon-clear.com.
